

Intuitive Surgical Announces Addition to Its Da Vinci(R) Product Line

January 11, 2006 at 4:01 PM EST

SUNNYVALE, CA, Jan 11, 2006 (MARKET WIRE via COMTEX News Network) -- Intuitive Surgical, Inc. (NASDAQ: ISRG), the global technology leader in robotic-assisted surgery, today announced the introduction of an addition to its da Vinci System product line.

The latest addition, called the da Vinci(R) S(TM) Surgical System, features fast setup, rapid instrument exchange, multi-quadrant access and multi-image display capabilities. In addition, the da Vinci S shares the same core technology as the standard da Vinci System, providing surgeons with unparalleled precision, dexterity and control.

Commenting on the announcement, Lonnie Smith, Chairman and CEO, of Intuitive Surgical said, "We are very pleased to add the da Vinci S System to our product line. We believe that the new features of the da Vinci S System will further streamline surgical procedures, improving efficiencies and shortening the learning curve for operating room teams."

The da Vinci S System will list for \$1.53 million, which is approximately \$200,000 more than the standard da Vinci System. Intuitive Surgical will showcase the da Vinci S System at the Society of Thoracic Surgeons meeting in Chicago later this month.

Intuitive Surgical will continue to sell, service and support the standard da Vinci System. The Company will also continue to invest in product development in order to expand the utility and longevity of all da Vinci Systems, instruments and accessories.

About Intuitive Surgical, Inc.

Intuitive Surgical, Inc. (NASDAQ: ISRG), headquartered in Sunnyvale, California, is the global technology leader in the rapidly emerging field of robotic-assisted, minimally invasive surgery (MIS). Intuitive Surgical develops, manufactures and markets robotic technologies designed to improve clinical outcomes and help patients return more quickly to active and productive lives. The company's mission is to extend the benefits of minimally invasive surgery to the broadest possible base of patients. About the da Vinci(R) Surgical System

The da Vinci Surgical System is a sophisticated robotic platform designed to enable complex surgery using a minimally invasive approach. The da Vinci System consists of an ergonomic surgeon's console, a patient-side cart with four interactive robotic arms, a high-performance vision system and proprietary EndoWrist(R) instruments. Powered by state-of-the-art robotic technology, the da Vinci System is designed to scale, filter and seamlessly translate the surgeon's hand movements into more precise movements of the EndoWrist instruments. The net result is an intuitive interface with breakthrough surgical capabilities. By providing surgeons with superior visualization, enhanced dexterity, greater precision and ergonomic comfort, the da Vinci Surgical System makes it possible for more surgeons to perform minimally invasive procedures involving complex dissection or reconstruction. This ultimately raises the standard of care for complex surgeries, translating into numerous potential patient benefits, including less pain, a shorter recovery and quicker return to normal daily activities.
